

# Building Advisory Service in demand

1989 has been a busy year for the Building and Planning Advisory Service at the State Library of New South Wales and for its Library Building Consultant, David Jones.

Established in January this year, the Service has been much in demand for projects large and small. These have ranged from writing the architectural

brief for a cooperative library storage facility, to preparing an action plan to relocate a major library during a \$92-million building project.

David's latest challenge is to prepare a brief for the new City of Sydney Public Library. The project will take this great city library out of temporary, makeshift premises into something

6

worthy of a world-class public library,' he said.

With several consultancies underway, and a healthy number of enquiries on future projects, 1990 is shaping up to be an even busier year for David and the Building and Planning Advisory Service.
